

## Agile Implementation

TOKN is platform technology that is simple to install and ready to use. Add value in weeks not months. TOKN provides the framework for managing your mobile ecosystem and supports a holistic approach to mobility in the Enterprise.

## Secure Data

TOKN separates work from play on your device using a secure container. TOKN provides the tools to capture, log and manage corporate data.

## Scale Delivery

On Premise or In the Cloud – What delivery option suites you? With TOKN you can access the delivery option that suites your business. The features are the same. You also get the flexibility to migrate between the two if your needs do change.

## Mobile Purchasing

TOKN supports the digital supply chain with apps to raise and approve purchase orders anywhere. Fully integrated to you business systems. Including mobile attachment capability and QR code scanning

## Field Inspections

TOKN supports safe productivity, providing digital tools for safety audits, surveys and inspection, including digital signatures.

## Mobile Approvals

TOKN supports seamless workflow, fully integrated with your ERP business logic. To allow approvals anywhere on any device. Saves time and resources by allowing users to setup their own devices.

## Field Maintenance

Mobile Asset Management is a major contributor to improved safety, productivity and cost. TOKN provides great apps, tested off-line processing and rugged device compatibility.

## Mobile Analytics

TOKN works with real data from the front line or enterprise systems, and brings it together in a simple and intuitive user interface.

## Mobile Logistics

Integrated bar-code scanning, and digital signature have moved logistics process beyond the warehouse.

## Mobile Human resources

With Mobile Human Resources TOKN liberates your employees and gives them an easier way to take control of their own careers, data, approvals and time recording

## Mobile Production

TOKN works offline to allow the capture and verification of mining data in the field. Drawing real time data to form insights and safely improve productivity

## Mobile Facilities Management

Manage building access, maintenance and inspections in a cost effective way and get rid of paper based systems with digital automation
