# Content Management System

Safety Updates

Broadcast Messages

Jobs Boards

Calendar & Events

News Bulletins

Documentation

The TOKN Content Management System allows for the creation and publication of content through a central, easy-to-use system. The CMS connects and engages your workforce by distributing information through the TOKN Mobility Client App, replacing the need for intranets or portals for workers on the go.

Give your organisation an identity. Create a “window” into the organisation, while reflecting your organisation's brand, style and image.
