

TOKN

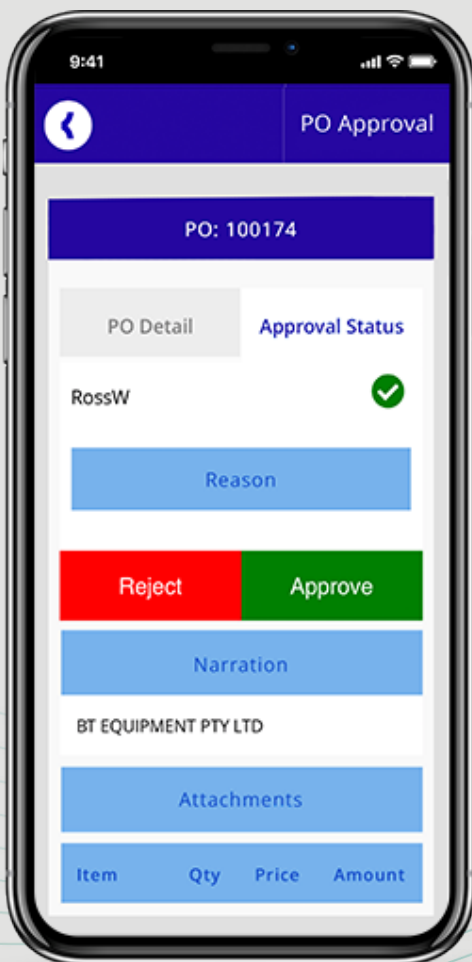

Purchasing made better

“ Automate repeatable tasks and boost efficiency at a fraction of the price.

Do more with less

Workers on site always need last minute materials, vehicles or labour to get the job done. Which means that purchase orders need to be raised, approved and sent off to the supplier ASAP!

The TOKN Purchase Order App streamlines your multi-level approval processes whilst instantly communicating all of your purchasing activity to your existing accounting system. Easily search for and approve purchase orders or use the intuitive field selections to add items, descriptions, quantities, amounts, and attachments to your PO.

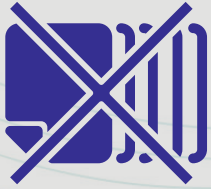

- Instant push notifications
- Manager group authorisations
- One click purchase order approval
- No more portal keys
- Remove risk of duplicate entries
- Integrates with business systems
- Online & offline capability
- Open supporting attachments

More gains with less effort

Increase in productivity

Remove duplication

30%

Increased data accuracy and timely receipt of goods

Remove paper-based processes

increased use of mobility within a simple framework

100%

“Our systems and processes have gone from good to great, all stakeholders of our business have benefited from the TOKN app”

Stephen Arndt , General Manger – PINDAN Asset Management

What will you create?

TOKN is more than just an app, it's a platform designed to help you build your own solutions. If you need something bespoke, TOKN can work with you to create the perfect solution. Free your system architecture and build your apps the way you want.
