hubflo

where teamwork is alive

Hubflo is a digital communication tool designed to drive a more socially responsible and engaged workforce. Powered by the award winning TOKN platform, Hubflo brings together essential Communication, Content Management, Productivity and Learning Management capabilities on one cloud platform. Hubflo is the central place where teams collaborate, learn and share. Ensure your teams, divisions and crews have access to the same information and systems at any time, where they can safely and securely comment, like, learn and belong.

your work and team together as one

- Responsive video streaming, live data feeds and messaging – news, job notices, wellness, safety notifications. No more delayed communication or email blasts!
- Close gaps in training, awareness and understanding via the Learning Management System, where results are stored and completion rates can be tracked.
- Share feedback and knowledge to drive transparency and understanding in a centralised space.
- Seamlessly integrate with your existing systems via the TOKN connect module and API framework.

“TOKN has been really flexible, supportive and innovative in finding us solutions for any of our challenges and it has been a great partnership throughout the life cycle of our business.”
