FS FieldSafe

Ensure a safe system of work with smarter workplace health and safety technology.

FieldSafe is a cutting edge cloud safety solution that features digital tools, smart mobile apps and cloud data widgets to proactively manage your safe system of work and ensure a complete compliance record. Used by technicians everywhere, FieldSafe is fast to deploy and puts safety in the hands of the people that matter most.

“Not only does this app help individual companies improve safety outcomes in their business, but it’s good for the safety culture of the entire electrical industry.”

Aidan O’Grady Chief Operations Officer
General Manager National Electricians Communications Association

BENEFITS

- Simplify your safe system of work.
- Immediate visibility of your complete digital compliance record of every safety interaction.
- Proactively manage risks and keep your team safe.
- Smart messaging- get notified ahead of time.
- Track all your safety interactions as they happen and avoid the risk of failing to act with proactive action management.
- Engage your employees with a better user experience on all devices, no more paper.
- Save with our low-cost cloud based service SaaS solution.
- Ensure your team are more informed and up to date with mobile learning management.
- Extend and Customise your app to suit your system of work.
- Integrated with your job management and business systems.

The FieldSafe Safety Suite is award winning technology that allows you to complete all your safety interactions from the palm of your hand, on your own device – anywhere at anytime.

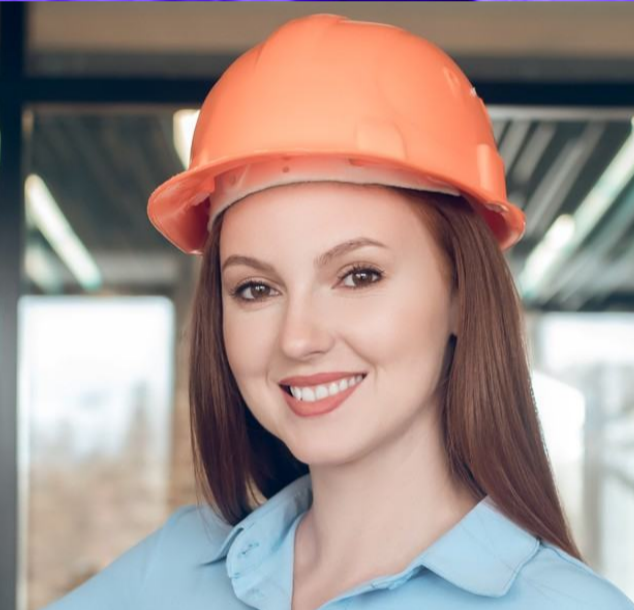

Utilise the intelligent software to help prevent an incident before it happens. Track reporting of all critical safety interactions and should something go wrong, in-built proactive messaging and alerts help keep you informed. All safety interactions are stored on the TOKN Cloud Platform and can be accessed from anywhere, ensuring you are always compliant. Report incidents, record the investigation and manage actions, audit processes and access procedure guides in the field.
