Unify
All your people, systems and data together, driving real transformation.

Simplify
Low maintenance, low -code, your business, the way you work.

Automate
Workflow automation and process efficiency.

Scale
Secure, scalable cloud delivery, sustained and renewed.

www.tokntechnology.com

Fast delivery of solutions that work the way you do.

Our Approach - Every enterprise is different

Off the shelf solutions often don't quite do what you need and enterprise customers require the flexibility to tailor solutions to suit their business and process. This can mean expensive software and technical resources.

The name TOKN is taken from the name given to a packet of data that moves between systems. A powerful iPaaS (Integration platform as a service), TOKN was designed to provide effortless integration, bringing systems and data together in one place, while providing powerful mobile access to that data . Connecting your workforce with little-to-no coding..

TOKN's makes this data available instantly in customised user interfaces. With self service digital capability, you can customise your integration and applications on one seemless cloud platform. Businesses of all sizes and budgets to rapidly digitally transform critical processes at scale, without the cost of expensive software and resources.

Your Systems   Your Team

Why TOKN?

- Ge the solution you need for the way you work
- Save countless hours with digital workflow automation - no more paper
- Save thousands with flexible Integration and API configuration
- Accelerated delivery with pre-built templates, improve speed and agility
- Simplify complex systems and Bring all your data together through powerful integration tools
- Save with Low code app customisation.
- Save on scaling up with TOKN's elastic cloud service and infrastructure with
- Accelerate controlled app roll out and delivery with TOKN's patented Mobile client technology.
- Security built in.
- Better user experience with our Offline Capability.
- Low maintenance and support

Innovation that connects your workforce

An expanding global ecosystem of vendors, resellers and customers.

TOKN is an innovative digital technology company founded on the vision to be the **Number #1 Rapid app** platform for medium sized businesses. TOKN sees a world where organisations, of all sizes and budgets, can easily harness the power of digital technology to drive efficiency.

Headquartered in Perth, TOKN is used by leading companies at over 300 sites across Australia, New Zealand, North America and South Africa.

Multi award winner for innovation, including **Most Transformation Business Solution** - WITTA (West Australian Innovation and Technology awards), Innovator of the Year, Telstra Best of Business State finalist. Core Hot 30 scales ups 2024.

TOKN is more than just a platform. It is an expanding global ecosystem of vendors, resellers and customers all working closely together to deliver solutions we love to use.

"The implementation of the TOKN Platform has resulted in vast efficiency improvements and improved cash flow throughout our workforce by automating some of our paper based processes."

Lisa Carey
Financial Controller - SMS Mining

Customer driven innovation

Harness the Power of Mobile Productivity

Innovative software that puts your system into your users hands.

TOKN Mobile App

TOKN's award winning, offline mobile client redefines the delivery of Mobile solutions in the enterprise . Available for all TOKN solutions, this mobile client simplifies the user experience, maximises security, accelerates app rollout Improves change management and reduces support and maintenance

Known as the "app within an app" concept, unique to TOKN, The mobile client   seamlessly renders app templates, allowing them to run natively on any device, with full integration to connected systems, instantly.

Whether it s a better workforce management , seamless contractor timesheet, smart asset inspection and tagging, Remote field service work or intuitive expense management, whatever the solution the TOKN client will redefine how you deliver and run that solution on a mobile device

No more delays to app delivery, no more security concerns. With one-step, password less enrolment, apps and changes are instantly available, securely controlled by TOKN.

Providing state of the art secure containerisation for all mobile applications, the TOKN Client secures your applications and data, separating work and play seamlessly, leaving you free to choose your device type while ensuring the highest level of device control and security.

The client are available for download on the IOS, Android, and Windows app stores. offers full offline processing functionality and bring your own device (BYOD) capability.

Offline Mobile app capability for all TOKN solutions

- Offline
- Rapid enrolment of new users
- Passwordless Bi-factor authentication
- White lable branding
- Flexible and Secure application delivery, management and deployment
- Secure, remote device management control with remote wipe , and blacklist functions.
- Secure BYOD device and data management

- Full app store support from TOKN
- Complete device flexibility
- Low maintenance
- Bi-factor authentication
- Full Native functionality including camera, spell check, voice to text , Video streaming, document management, QR code and NFC tag scanning

Integrate in a snap

## Accelerate time to market with fast, low code integration tools

TOKN Connect

Real-time data exchange is the key that automates your processes, delivering the value you need to scale you business. But this is so often not achieve due to complexity and cost.

TOKN Connect, is a comprehensive enterprise integration framework, for fast secure configuration of real-time data exchange. TOKN Connect bundles all the low code integration capability required to easily connect multiple systems, group companies, charts of account, making them available with powerful apps, in half the time. Accelerating any app project and increasing ROI.

Fast, Secure, real-time integration - NO more batch loads

- Fast secure data transfer and performance
- Process Automation with real time data - No uploads
- Customise your integration across REST/SOAP/OData protocols
- Save time with Rapid API enrolment and testing
- Secure API management and encryption tools
- App integration with Seamless compatibility with all TOKN apps.
- Controlled data access with TOKN Open APIs.

- Secured with HTTPS certificate encryption and customer specific authentication.
- Compatible with MYOB XERO SIMPRO IFS SAP WIISE PRONTO Microsoft Dynamics Active Directory, SQL and more
- Peace of mind with Full API Monitoring , error logs, alerts and diagnostic tools Save time with Rapid API enrolment and testing
- Containerised with auto scaling
- Zero downtime for upgrades

Fast, reliable integration to your systems

Automate you workflow

Up to date and in the right place all the time

Workflow

Simplify user management and app administration, in one self service module. Save 100's of hours in back office time by automating user creation and app deployment with workflow microservices .

TOKN Workflow unifies end user data across different business systems, providing a high degree of flexibility, in how users interact with connected systems and seamless, password less user enrolment .

Easy user management

- Centralised user management - with AD integration
- Targeted Mobile App deployment
- Controlled app rollout options, one user, team, division at a time.
- Flexible approval workflow configuration
- Messaging and alert managment

- New user Upload and integration options.
- No App store delays
- Simplified user enrolment - Once click enrolment
- Centralise app delivery across multiple systems.

Low code app delivery

Workbench

Accelerate you app delivery even further with native low code development tools. App projects often run over budget and required expensive development resources and software. TOKN include the capability to increase speed and agility, delivering you innovation sooner.

Whatever your project, from simple web forms to more complex apps, TOKN includes accelerators, pre-built app components, template libraries, along with full code editors that help realise you innovation faster

App testing tools to visualise mobile apps. Code promotion features to seamlessly promote code between DEV, WAS & PRD instances

- Low code app workbench
- Full code editor
- App template library
- Process Automation with real time data - No uploads.
- App testing tools to visualise mobile apps
- Full life cycle management DEV, QAS & Production instances.

- Code promotion features to seamlessly promote code between DEV, QAS & PRD instances.
- Integration with TOKN Connect, DATA structures, and micro services .
- Custom Code upload functions to import code snippets.

A modern comms tool for the workforce
No more PDF email blasts

Content Management

A modern content solution that works for you. Enhancing you workplace culture and workflows, saving you time and keeping your organisation more connected.

Publish 2x fast, into the users hands. Connect and engage your workforce, distributing vital information instantly - no more unread emails and intranets , designed for workers on the go.

Give your organisation an identity and create a "window" into the organisation, while reflecting your organisation's brand, style and image.

Articles, Posts, News, Inductions, Broadcasts, Policies, Safety, Wellness , Benefits, Jobs and more..

Pulish 2x Fast

- Organise and find documents, images and videos easily
- East fast publishing
- Delegate publishing authority
- Offline mobile app integration
- Flexible and customisable
- Powerful integration with Sharepoint , Teams and more.

- Video streaming,
- Messaging,
- Learning management
- Document management.
- Remote support for Bring Your Own Device
- Embedded app analytics to find out what content is most popular.

Device control with peace of mind

Control

Take device security to the next level with enhanced mobile security and remote monitoring capability. TOKN Control provides a comprehensive device management framework, with a complete view of, and control over, all connected devices. Managing connected devices has never been easier and more comprehensive.

Get the facts - instant app stats on how the app is performing and how much its being used. giving you the facts and allowing faster more well informed decisions, on your innovation and rollout are doing.

Get the facts

- Central device management framework, manage all connected devices in one clear dashboard.
- Full control, Remote Wipe and Blacklisting.
- Geo-location including geo-position and geo-ring fencing.
- Deploy app updates and changes, instantly

- Remote support for Bring Your Own Device
- App analytic, Usage and performance bases reporting
- BYOD - Full Bring you own device
- Rea time alerts and monitoring
- Support for multiple device connectivity.
- Embedded app analytics, reports and change logs.
